

YAZAN FARRAH

Amman, Jordan • +962 77 562 3004 • yazanfarrah03@gmail.com • linkedin.com/in/yazan-farrah-795216227

Software engineer with 4+ years shipping production mobile and backend systems (Flutter, Ruby on Rails). Cut a recurring infrastructure cost, fixed a backend bottleneck that was pushing servers to near-capacity, and now works across telephony migrations and CRM integrations at Maqsam.

EXPERIENCE

Software Engineer, Maqsam

Cloud telephony platform, Amman, Jordan | Jun 2025 – Present

- Production crashes had no visibility before Firebase Crashlytics went in. Added it and cut triage time significantly.
- Cut mobile RAM usage by ~23% through object lifecycle optimizations, which noticeably improved stability on lower-end devices.
- Servers were spiking to ~98% usage for accounts with high contact volumes. Traced it to how those accounts were being queried and redesigned the approach.
- Moved outbound voice calls off a third-party provider to an in-house solution. Saves the company about \$3,500 every month.
- Rebuilt the client portal's integrations UI, replacing legacy .erb/HTML with Vue for a faster, more modern experience.
- Currently working on migrating Maqsam's telephony platform from Twilio to an in-house voice stack, alongside CRM integrations across Pipedrive, Salesforce, HubSpot, and Intercom.

Senior Mobile Engineer, CodePro

Amman, Jordan | Dec 2022 – Jun 2025

- Built and shipped a mobile app that's now in daily use at one of Jordan's largest e-learning platforms.
- Led the team that delivered a mobile app for a major medical insurance provider handling sensitive user data at scale.
- Given a 1-month deadline for the Jordan International Food Festival (JIFF), built the ticketing platform that processed thousands of concurrent purchases for thousands of daily attendees.
- Also built JIFF's ticket-scanning app to catch duplicate and fraudulent entries at the gate, a problem that could've cost the event real revenue.
- 5+ Flutter apps shipped across e-learning, healthcare, and events, each integrating REST APIs and payment gateways.

EDUCATION

Bachelor's in Computer Science, Princess Sumaya University for Technology

Amman, Jordan | 2018 – 2023

CORE COMPETENCIES

Mobile: Flutter, Dart, Kotlin, Swift

Backend: Ruby on Rails, RESTful APIs, PostgreSQL, Vue.js

Infrastructure & Architecture: Clean Architecture, CI/CD, Docker, Pulumi (IaC)

Version Control & Workflow: Git, GitHub, GitLab, Phabricator

Project Management: Agile, Scrum, JIRA

LANGUAGES

English, Arabic
